Program Development · Online Management · Event Realisation

MANAGEMENT OF SOLAR CONFERENCES

PSE solar conference management provides a complete range of services to make your solar conference a success. From the creation of the scientific program to on-location event coordination and everything in between, PSE has years of experience organizing scientific conferences and research meetings world-wide.

Solar energy is our focus, and our scientific knowledge and organizational expertise is our strong base to meet all your conference goals. While PSE manages the details, your time at the conference can be focused on discussing solar issues with old friends and new colleagues.

OUR CLIENTS

Since 1996 PSE has been managing solar conferences and workshops. One of our first clients has been ISES with the EuroSun conference, followed by other major organizations like the German Aerospace Center (DLR), hosting SolarPACES, and the Fraunhofer Institute for Solar Energy Systems (ISE), host of conferences like CPV-6 and SiliconPV.

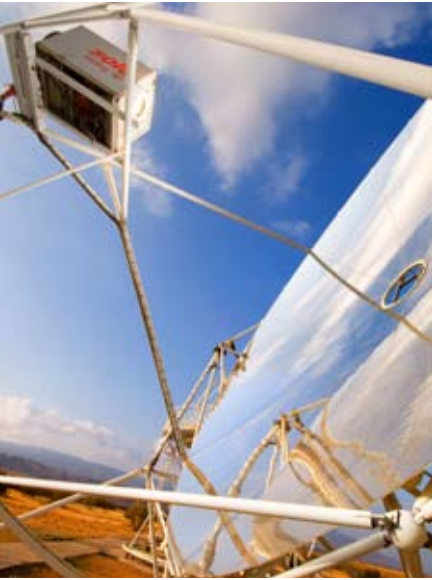

Have a look at some of our references, available in the world wide web:

SCIENTIFIC PROGRAM DEVELOPMENT

PSE has a wealth of experience developing scientific programs for solar conferences. Our knowledge of the science and overview of the current challenges allow us to suggest a program with out-standing quality content and high relevance. Well connected with solar researchers and research institutions, we are a valuable partner of the scientific committee and can recommend committee members and key-note speakers as well.

- Develop a scientific program with research and market relevance or supply the chair of the conference with a customized program development tool
- Recommend committee members
- Select speakers

CONFERENCE DATABASE MANAGEMENT

Managing the scientific content of a conference is a detailed process that has to be organized with a long timeframe. After completing the call for papers, several months are needed to collect, review and accept papers, and create the detailed conference program.

PSE has developed a proprietary database and data management process to effectively oversee the entire conference process that starts with the call for papers, followed by the delivery of presentations during the conference and ends with the publication of the proceedings.

- Develop a conference homepage, register attendees, and collect fees
- Send, collect and organize the call for abstracts and papers by a platform-independent web application
- Create a customized online workflow for review and approvals
- Provide an integrated database creation program
- Organize and publish conference programs and citable conference proceedings

EVENT REALISATION

The success of a conference is connected to the quality of the program and speakers, the number of attendees, and the types of sponsors and supporters. A complete communication program including mailings, newsletters, press releases and advertising through media partners and on industry websites will be designed to suit your needs.

PSE has the experience to help define the conference location, evaluate and select hotels, and negotiate arrangements for the festive conference dinner and the technical and sightseeing tours. And, of course, our staff will be on-hand to take on-site registrations, answer questions, support the speakers, and pay attention that catering, meeting rooms, signage, audio-visual equipment ... will be in place and ready. We will ensure everyone has an enjoyable and productive time. Increase conference attendance with a comprehensive communication program

- Create attractive sponsorship packages and acquire sponsors
- Manage hotel, food and travel logistics
- Arrange and realise all on-site (Angelegenheiten) before, during and after the conference

FULL SERVICE

PSE offers the complete range of tasks for a successful conference organization, bookable as a complete or individual package. We manage any size of conference – past events have ranged from 10 to more than 1000 participants.

Before and during the conference our clients experience complete peace of mind, knowing we have the extensive know-how promoting conferences, enlisting sponsors, taking care of attendees and managing logistics and technical equipment. Throughout the show, you may rely on our friendly and competent service. We ensure everyone has an enjoyable and productive time at the conference.

With our extensive network in the solar community, we know your needs and we are dedicated to our work – we love what we do!

We look forward to hearing from you!

SOLAR CONFERENCE MANAGEMENT WORLDWIDE

We are proud to have managed solar conferences worldwide. In major conferences like SiliconPV, CPV, SolarPACES, ISES Solar World Congress and EuroSun we were glad to show our expertise.

*„PSE has proven to be a consistent and reliable partner with a keen eye for detail. We have received entirely positive feedback from our participants at the CPV Conferences for your creative conceptualization and technical implementing.
Many thanks to your professional and dynamic team!“*

Sarah Kurtz,
NREL, USA

„PSE is the company with extensive know-how to organise and tailor your conference to a great success. Thank you especially for your professional team and your technical backbone at the SolarPACES conferences. Your data management to process the entire workflow for abstracts, papers and proceedings is just brilliant.“

PSE – FIELDS OF COMPETENCE

SOLAR TEST STANDS

Our line of precision testing equipment measures the performance and reliability of solar thermal collectors and PV modules, both indoors and outdoors. Researchers and manufacturers take advantage of the robust testing platforms for certification measurements according to all international standards.

SOLAR CONFERENCES

PSE designs, organises and manages international solar conferences from start to finish. With years of solar conference experience, the team provides professional insight and creative ideas in all aspects of a conference from scientific content management to on-site conference activities.

SOLAR CONSULTING

PSE rural electrification consulting brings professional off-grid solar experience to the design and monitoring of rural projects in Asia and Africa. PSE solar research professionals manage complex, multi-year solar research programs from proposal writing to final reporting.
